

## 9th Swiss Think Tank

The 9th Swiss Cyber Think Tank (SCTT) was hosted by Microsoft and Optimity Advisors and took place at Microsoft in Wallisellen. I would like to thank both hosts for the organization and the commitment to our 9<sup>th</sup> Swiss Cyber Think Tank. The motto of this SCTT was “Cyber Risk & Insurability: A Holistic Approach to Cyber Risk”.

A warm thank you to our presenters Dr. Doron Zimmermann of PostMail, Dustin Ingalls, Daniel von Büren and Sasa Vidanovic of Microsoft, Alex Verboon and Tamás Szivós-Aradi of Swiss Re, Daniel Caduff and Dario Walder of the Federal Office for National Economic Supply FONES.

Microsoft presented the Core Principles of the Threat & Identity Management solutions. It is important to be ahead of those who do harm to technology and systems and to understand how criminals operate. This not only requires the understanding of the Internet of Things, but also of the complexity and the underlying security processes of the Cloud Technology. The presenters demonstrated the [Intelligent Security Graph](#) through the real-life scenario of an email with a criminal purpose entering the network. A use case demonstrated five key pillars of a modern security strategy: Identity, Threat Protection, Information Protection, Security Management and Intelligence and how it is important that all five pillars are part of the overall Cyber security strategy. The presenters also showed how people in [Microsoft Cyber Defense Operating Center](#) protect, detect and respond to cyber-threats in real time as well as how [Microsoft Digital Crime Unit](#) is helping fighting Cyber crime on a global level.

Dr. Doron Zimmermann presented the topic: “The Antagonists - the Risks of Insider Threats and Counter-Intelligence”. The generally underestimated spectrum of insider threats includes not only the near stereotypical disgruntled employee, but also increasingly espionage, embezzlement and sabotage. His practical examples illustrated the tangible reality of the insider threat. Self-satisfaction, willful ignorance and outright denial of the insider threat is ubiquitous and therefore problematic. The impact of the insider threat may well lie in the realm of trust and reputation damage; it is not all about money.

The presenters Daniel Caduff and Dario Walder from the Federal Office for National Economic Supply FONES presented the ICT Minimal Standards (for the power and food supply industries) which protect Switzerland from damage due to Cyber Risks. For both industries, the early detection of, resilience to, and reduction of cyber risks are important factors. The ICT Minimal Standards and the activities for a risk-based approach were shared with the audience. <https://sway.com/ICVaaGyx4ljehZug?ref=email>

# 9th Swiss Cyber Think Tank

“Cyber Risk & Insurability: A Holistic Approach to Cyber Risk”

## Agenda

- Welcome & Coffee
- **The Antagonists: Of Insider Threats and Counter-Intelligence**
  - Dr Doron Zimmermann (Cantab.), Head Security & Safety, PostMail (PM4/5)
- **Postenlauf: Cyber Security, Tools and Use Cases**
  - Daniel von Büren, TSP Threat Management, Microsoft Schweiz GmbH
- **IKT-Minimalsicherheitsstandard**
  - Daniel Caduff, Stv. Geschäftsstellenleiter Bereich IKT, Bundesamt für Wirtschaftliche Landesversorgung
  - Dario Walder, Projektleiter Verwundbarkeitsanalysen, Bundesamt für Wirtschaftliche Landesversorgung
- Questions and Answers
- The 10th Swiss Cyber Think Tank
- Apéro
